

KANJAR DE

AI Governance & Responsible AI · Applied ML background

Stockholm, Sweden · +46 730 538 228 · kanjar.de@gmail.com · [linkedin.com/in/kanjar-de](https://www.linkedin.com/in/kanjar-de) · kanlions.github.io

PROFILE

Applied AI professional moving into AI governance, with formal credentials in the field — AIGP, ISO/IEC 42001 and ISO/IEC 27001 Lead Implementer — and current research on AI regulations and standards (EU AI Act, ISO/IEC 42001, NIST AI RMF). Backed by six years of applied machine learning research in computer vision, model robustness, and generative models — combining how AI systems are built with the regulations and standards that now govern them.

CORE COMPETENCIES

AI Governance & Risk: EU AI Act conformity assessment, ISO/IEC 42001 (AI management systems), ISO/IEC 27001 (information security), ISO 31000, NIST AI RMF, AI risk assessment, technical documentation, compliance gap analysis, data quality

Standards & Frameworks: ISO/IEC 42001 Lead Implementer, ISO/IEC 27001 Lead Implementer, ISO 31000 Risk Management, CSA AI Controls Matrix, model risk management

Technical Foundation: Machine learning, computer vision, generative models, LLMs, model robustness, agentic AI, Model Context Protocol (MCP); Python, Rust, C/C++, SQL; PyTorch, TensorFlow, scikit-learn, Hugging Face

CERTIFICATIONS

- AI Governance Professional (AIGP) — IAPP | Trusted AI Safety Expert (TAISE) — Cloud Security Alliance | GARP Risk and AI | Certified in Managing AI (CPMAI) — PMI
- ISO/IEC 42001 Lead Implementer, ISO/IEC 27001 Lead Implementer, and ISO 31000 Risk Management — TÜV SÜD

EXPERIENCE

R&D Engineer — RISE Research Institutes, Stockholm

Nov 2024 – Present

- Research AI regulations and ISO standards — including the EU AI Act, ISO/IEC 42001, and NIST AI RMF — analysing their requirements for high-risk AI systems in regulated sectors and how they map to one another.
- Contribute to data quality criteria development for the EU TEF-Health project on testing and experimentation of health AI, as part of a collaborative research team.
- Conduct stakeholder interviews and requirements analysis to scope AI applications against regulatory needs.

Researcher (Clinical AI) — Karolinska Institutet, Stockholm

Nov 2024 – Present

- Develop ML models for clinical applications with explicit attention to regulatory pathway, technical documentation, and integration into real-world clinical workflows — bridging model development and the evidence a regulated deployment requires.

Researcher — Fraunhofer HHI, Berlin (Video Coding Systems Group)

Aug 2023 – Jul 2024

- Conducted standards-aligned quality assessment and benchmarking for Versatile Video Coding (VVC) using PSNR, MS-SSIM, and VMAF. Funded by the competitive ERCIM Alain Bensoussan International Fellowship.

Researcher — Luleå University of Technology (EISLAB ML)

Jun 2021 – Jun 2023

- Co-authored a successful GPU-infrastructure funding proposal; partnered with a Swedish SME on a UAV imagery dataset published at a CVPR workshop; supported the Brain Analysis Group with research and dataset creation.

Researcher — NTNU, Gjøvik (Colorlab)

Mar 2019 – Feb 2020

- Investigated deep-learning robustness — quantified how colour distortions affect neural-network reliability; built specialised datasets for robustness assessment. Funded by the competitive ERCIM Alain Bensoussan Fellowship.

Postdoctoral Fellow — IIT Roorkee

Aug 2017 – Feb 2019

- Independent research across generative models, zero-shot learning, recommender systems, and biometrics, resulting in peer-reviewed publications.

EDUCATION

- Ph.D., Computer Science — IIITDM Kancheepuram | M.Tech., Information Technology — IIIT Bangalore | B.Tech., Electronics & Communication — Sikkim Manipal Institute of Technology

AWARDS & RECOGNITION

- ERCIM Alain Bensoussan International Fellowship (×2) | First Prize — AI Sweden "Walking on Thin Clouds" Hackathon (2023) and g.tec Brain4io Data Analysis Hackathon (Austria, 2023)
- 24 peer-reviewed publications in computer vision, model robustness, and AI (full list at kanlions.github.io) | Invited talks: VIT Bhopal (2026), BMS Bangalore (2022), IIT Roorkee (2018)
